GENEROUS GIFT OF SAMUEL NEWHOUSE

Mining Man Donates Valuable Site for New Mining Exchange Home.

MEMBERS OF 'CHANGE ACCEPT FINE OFFER

Means New Exchange Building in Skyscraper Part of the City.

By unanimous vote Wednesday siter noon the members of the Salt Lake Stock and Mining Exchange accepted the offer of Samuel Newhouse of a block of ground for a new exchange building. This practically closes a question that has been sigitating the minds of the stock exchange. members for over two years, for while the matter of accepting or refusing Mr. Newhouse's offer was entirely in the hands of the members of the governing board, the board preferred the members to express themselves individually.

This happy outcome of the exchange site is the culmination of a promise nade by Mr. Newhouse two years ago to James A. Pollock, president of the exchange, to the effect that he desired to place the exchange in a more adequate home than the one now utilized on West | Daly

place the exchange in a more adequate home than the one now utilized on West Second South street.

Mr. Pollock called the members legather yesterday and presented the proposition Mr. Newhouse had made. Mr. Newhouse freez absolutely to the exchange a block of ground in the heart of the new business section, \$2 by \$2 feet in extent, on Exchange Place, being the street on which both the new skyscrapers are facing. This particular piece of ground cost Mr. Newhouse \$27,000 a year ago, and the improvements since that time have so enhanced the imperty that real estate experts place a valuation of between \$30,000 and \$60,000 on the same at this date. The only restriction placed by Mr. Newhouse on this generods girl is that the exchange erect a suitable building, the kind and cost of which being entirely in the hands of the exchange.

There are two means by which the money necessary to the exchange, one being by voluntary subscription on the part of the manders, it is a building can be raised, as stated by Mr. Pollock at yesterday's meeting, one being by voluntary subscription on the part of the members, the other being by an issue of bonds. The latter course is favored from a business standpoint, and several members expressed a willingnoss to take several thousand dollars' worth of the bonds in western hands without any trouble. The cost of the building was only stated approximately, but the members are in favor of a \$60,000 home, or even a more ceasily one, making it an ornament as well as an ideal center for the building man has taken such a substantial interest in the exchange, one and all expressed themselves very enthusiastically over this offer of Mr. Newhouse, it being the first instance where a local minding man has taken such a substantial interest in the exchange and tire welfare. Mr. Newhouse was given a vale of thanks in a very hearty manner, and the most.

mining man has taken such a substantial interest in the exchange and its welfare. Mr. Newhouse was given a vote of thursies in a very hearty manner, and the meeting broke up with expressions of gratitude and gratification on all sides. The governing board has expressed itself favorable to accepting the offer, all that stood in the way of final action was the wish for an individual expression from the members. And this was given vesterday in a most positive manner by everyone. The gift has entanced the value of the memberships \$500 cach on the value of the real state alone, while with the building erected, an additional valuation of \$500 or more will attach to these memberships.

deningerships.

Mr. Newhouse's recognition of the Sait ake Stock and Mining Exchange is a ribute to that body and its memorrs in everal ways. It illustrates the estimation in which the institution is held by hard-bounder benefit

LOWER MAMMOTH CARS ARE COMING IN NOW

Wednesday was a significant day in the Lower Mammoth offices in this city, for the bill of lading of the first two care of ore shipped from the inine since last November was received. This shipment comes from the 1209-foot level of the mine, and it is consigned to the Knight smeltling works at Tinite with which company the Lower Mammoth has a very satisfactory ore contract. Lower Mammoth stockholders are delighted with the resumption of shipments after so long a period of lideness and the fact that ores are being extracted from that depth allows a campaign of development work to proceed that has been impossible for almost a year past owing to the expense of running the lower hoist. Now the management is developing on the 1209, 1500 and 1700-foot levels, and conditions are such that additional temages can be placed in sight far faster than ores can be extracted for market. Week on the upper levels also is being continued, and the Lower Mammoth is assuming something like its old-time appearance.

INDIAN QUEEN MAKING VERY FAST HEADWAY

The Indian Queen company is making things hum on a large scale down in Beaver county, and L. N. Morrison, one of the officials of the company stated yesterday that the management is now breaking ahead at the rate of eleven and one-half feet a day. This spiendid rate of speed is easy with the machine drills, and the character of the formation that presents itself ahead. This formation is a gray limestone. The tunnel on Wednesday morning was at the 1868-too! point from the mouth. When asked how far the present face was from the point whete the ores are expected to be, Mr. Morrison said he might estimate the distance but deemed it better to wait awhile until the work has progressed farther. He is satisfied in every way with the present shape of the property and company affairs.

WORK ON ZINC MILL IS WELL UNDER WAY

G. W. Lambourne, general manager of the Daiy Judge Mining company, is back from Park City, where he spent a couple of days looking over the property. He reports everything satisfactory in the Judge, but nothing especially is new at this time. Mr. Lambourne says that the construction engineer of the Grasscell Chemical company, the company operating the new zine plant at Park, has arrived on the scene, and the task of heroesing the enpacity of the plant is now well under way. The equipment for the addition is being received, and within two months everything is expected to be in shape for heavy production. company, the company operating the new zinc plant at Park, has arrived on the scene, and the task of increasing the capacity of the plant is now well under way. The equipment for the addition is being received, and within two months everything is expected to be in shape for heavy production.

The ore and Bullion.

The ore and bullion report for Weinesday, given by McCornick & Co. was as follows: Ore received, \$10,000; buillon shipped, \$30,000.

UNITED STATES STOCK SALES SWELL BUSINESS

The sale Wednesday on the local exhonge of 1400 shares of United States change of 1400 shares of United States Smeiting, Refining and Mining company's common stock rescued the cash total of business done from the ordinary that has surrounded the exchange for several days east. It is not generally appreciated that liere are some very extensive western interests in this company, in Utah alone it being entimated that fully \$1,000,000 worth of this stock is held. Wednesday on the exchange 66,408 shares of stock hold, having a market value of \$110,152,15. The following were the closing unilsted and listed stock transactions:

Group Surrounded by Several Great Mines of the Tintic District.

PLUTUS GETS MORE

VALUABLE CLAIMS

Knight-Evans Interests Have

Widened Holdings of the

Plutus Company.

It was learned yesterday that a very Important mining deal had been consummated by which the Jesse Knight and the Dave Evans interests have correlled the mated by which the Jesse Kright and the Dave Evans interests have corralled the entire property holdings of the North Mammoth Mining company. This purchase of additional Tintic territory by these interests was made for the Plutus Mining company. The Plutus company was organized two years ago by the Kright-Evans people, and since then a quiet but very energetic campaign of territorial acquisition has been under way. With the addition of the North Mammoth G. Wonder G. Wonde

Mining company. The Plutus company was organized two years ago by the Kuight-Evans people, and since then a quiet but very energetic campaign of territorial acquisition has been under way. With the addition of the North Mammoth group, the Plutus company now is the owner of what local circles agree is one of the most valuable and desirable undeveloped pieces of property in the Tintic mining district.

The claims of the North Mammoth company were the Modea, West Medea and the Jason, and while the purchase price is not stated, it is known to rank as one of the big Tintic deals of the present senson. The Plutus company how has within its lines ten patented claffus, inaving taken over the possessions of the Plutus Consolidated and the Juab Mining companies some time ago.

Surrounding the holdings of the Plutus company are several of the largest mines of Tintic. The group adjoins the Mammoth and Tetro on the north; the Grand Central and Victoria on the west and the Godiva and Apex on the east. All the preliminary work of placing the property in shape for active work has been accomplished and nothing is in the way of the management giving the word to begin before the snows of winter fly.

The Knight-Evans Interests recently have brought out the noted King David company, following closely on the Ibex and the Indian Queen, and it is known that few of their properties are considered by them more ideally located than the Plutus.

CROSSCIT OF VERINGTON

CROSSCUT OF YERINGTON COPPER IN MUCH ORE

Each day makes it more apparent that the company to land the honor of producing the fifth mine for the Yerington copper district of Nevada is the Yerington copper district of Nevada is the Yerington copper company, the organization of Sait Lakers now doing energetic work at depth on the property near the Bine Jay on the cast rim of Mason valley, General Manager Joseph E. Caine stated to the Tribume resterday that he had fust received a letter from Superintendent Marsail, which gave some details which he has been wanting for several days.

Mr. Marsal states that from the station on the 469-foot level he crosseut a distance of twenty-one feet through the countered. This distance showed a splendid mineralization all the way, and the crosseut since has proceeded twenty feet into the yein without encountering the hanging wall. This twenty feet all is copper sulphide ore, a fair sample of which followed the letter but has not been received yet. It is the intention of Mr. Marsal to proceed with the crosscut to the hanging wall, then to drift on the vein towards the east. It will not be attempted to drive the shaft to a deeper level until the new cable now ordered has been received and installed. Then a vigorous campaign to better depths will be started by the company, Mr. Marsal speaks very enthusiastically about the property, and exceeds his usual cold-bloodedness when discussing the merits of the mine.

THE COPPER OUTPUT

Path of Enormous Copper Production.

to feel gratified over the way in which the Utah copper producers are making their influence felt on the red metal situation of the country at present. A fee days ago the Boston News Bureau gay

their influence felt on the real metal situation of the country at present. A few days ago the Boston News Bureau gave the copper production for July, and in the article which is here reproduced a compliment was paid to Utah mines which well deserved and significant. While Utah copper mines are doing their share towards bringing the country's entire their towards bringing the country's entire in the state towards bringing the country's entire achievements will be small in comparison to what will be the case when the big mines strike their logical gait. The article referred to follows:

For the month of July the copper production of the United States, Mexico and Canada was at the highest point of the year; in fact, the highest point of the year; in fact, the highest point of the year; in fact, the highest point gains a year ago. The estimated production amounted to 92 190,000 pounds, compared with 98,823,370 pounds a year ago. The failing off was largely in Missico Butte was within 1,000,009 pounds, of last year's July output. The Lake was shout the same as last year, and Arizona was about as large. Utah exceeded July a year ago by less than 1,000,000 pounds, notwithstanding the increased production from the Utah Copper company, but a year ago be Utah Copper company, but a year ago be Utah reaches the 10,000,000 pounds and year ago the United States emelter and the Orgien independent smelter again in commission, before Utah reaches the 10,000,000 pounds, and the following pounds a month. It will not be long now, with the United States smelter and the Orgien independent smelter again in commission, before Utah reaches the 10,000,000,000 pounds, in pounds.

The total production of copper for the first seven months of this year compared with two previous years was as follows, in pounds.

Total first six months: 1908—38,481,581, July: 1908—92,20,270.

Total seven months of this year he production for the last four months of the year regulation in copper output, the production of the last four months of the year regu

New York-Boston Letters.

New York-Boston Letters.

James A. Pollock & Co., bankers and brokers, 6 West Second South street, furnish the following, received over their private wire yesterday afternoon.

Walker letter, New York—The market was very Irregular and nerveus at the opening. Later there was some bidding up, and under lead of Union Pacific the market became quite strong. We look for an active trading market tomorrow and one in which sharp turns can be made.

Hornblower letter, Boston—Trading in the leading copper sharps somewhat higher, loss on the leading copper sharps somewhat higher, houses with western connections being the principal buyers. Miami, which has been traded in on the curb, was today listed on the local stock exchange and was active at sround the Some profittaking was noticeable during the afternoon and prices were shaded somewhat towards the close.

STEAM PLANT PLANS FOR THE KING DAVID

Manager Evans Is Figuring on Big Equipment for the Property.

General Manager David Evans, of the King David Mining company, came up from Beaver county Wednesday morning for the purpose of securing equipment for the company. The first thing he did was to place an order for over 30,000 feet of water pipe, which will be strung between the mine adjoining the Horn Silver in Beaver county to the springs owned by the company. Mr. Evans stated to The Tribune shortly after his arrival that

The Tribune shortly after his arrival that he was figuring on purchasing a complete steam plant for the property, and that he expected to have the plant under cover and in operation before the arrival of winter weather.

This equipment, he stated, will consist in part of a heist of 150-horse power capacity; a boiler plant of 300-horse power capacity; and a compressor capable of handling ten drills. As soon as these various plants of machinery can be properly adjusted, development work on a large scale will be the order of the day for the King David. The management in the meantime is working in the main shaft, and the entire property is being prepared for the heavy work before it. Mr. Evans says the group soon will demonstrate the truth of his early prediction to the effect that the company has in its Beaver county possessions one of the biggest mines in the State.

Ore Shipments.

The Plonter sampler on Wednesday re-leased three cars of ore from Utah camps. The Taylor and Brunton company re-leased the following: Utah, 5; Nevada, 2.

TEA

How has so dainty a drink as tea gone over the world so far, and made friends so many?

Your grocer returns your money if you don't ilke Schilling's Best; we pay him.

15 YEARS CONSULTING MINING ENGINEERS

You Have a Mining Property.

"Good showing," perhaps, but some-thing needed to "bring it out." I make examinations, geological, mineralogical, metalhurgical, mechanical and economical, with complete report, maps and outline an operating system and general hand-ling of the property. Will superlatend if desired. Terms and arrangements sat-isfactory. W. C. MARSHALL, M. E.
